Northwest Corner of Fifteenth and Pennsylvania Ave. Charles J. Bell, President.

EXTRACTS FROM SPEECHES IN HOUSE.

- Mr. PERKINS-If it was believed that a majority of this body were in fear that their acts might be investigated and their crimes discovered, the respect of the people, which it is important for the republic that Congress should possess, would be impaired, if not destroyed. It is dangerous to the republic that a large portion of the people should have their confidence shaken in the judges who interpret the law; it is equally dangerous that their confidence should be impaired in those who enact the laws, and it is for this reason that the duty devolves upon the lawmakers not to allow the integrity of their motives to be lightly questioned.
- Mr. DENBY-New that the whole painful episode nears its end, I may say that the most distressing feature is that the President of the United States, justly honored and beloved as he is throughout the land, should so little appreciate the effect of his own words, and should apparently so little consider his own great fame. He has lost a great opportunity-an opportunity to display the possession of one great attribute of true greatness-the capacity to realize when he has done injustice and the willingness to correct that mistake.
- Mr. TAWNEY-No disclaimer now, however strenuous and vehement, can modify or change either the meaning of the language used by the President or its interpretation by the people and by the press of this country, under which interpretation the honor and integrity of Congress has been assailed and stands impeached. It is because of the interpretation of the language used and its effect upon their confidence in this branch of their government that I deem it important to treat the charge as it has been accepted and is understood by the people generally. Again, I regret that I am obliged to call public attention to the fact that the President of the United States has misquoted what I said.
- Mr. SMITH-Never again, if I can prevent it, shall the old system of law defiance and law evasion; the system of broken oaths of office, of illegal expenditure of money appropriated, of padded accounts, of false certificates, of the constant commission of felonies by public officers, of simple lying, and of tergiversation be restored to the public
- Mr. SHERLEY-Instead of such a response, however, the President has declared that the language used by him does not mean what it plainly says, and an effort is made to change the issue existing between the House and the Executive. In my reading of history, I recall no instance where a government perished because of the absence of a secret service force, but many there are that perished as a result of the spy system. If Anglo-Saxon civilization stands for anything, it is for a government where the humblest citizen is safeguarded against the secret activities of the executive of the government.
